The jam cooking pot is made from high quality stainless steel material - AISI 304. Suitable for hotels, small kitchens, school kitchens, catering facilities.

cooking pot with cooking plate

Model: ENS 50

Easy and efficient production of different kind of jams

The stainless steel cooking pot with agitator model ENS 50 is used for cooking different kinds of jams and other food products (e.g. jam, jellies, goulash etc.). The user is able to easily and efficiently produce different kind of jams. The cooked jam can be filled directly into the jars through a special valve mounted at the side of the bottom.

Electric stove technical details:

- 40 cm diameter plate
- for pots up to 100 l
- Completely made of stainless steel
- Power: 5 kW
- dimensions: 580x580x380 mm

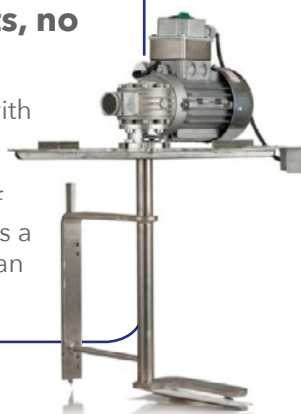

Cooking pot technical details:

- SINGLE PHASE MOTOR 220V
- POWER 0,12kW (OVERHEAT PROTECTION)
- 50 LITER CAPACITY
- STAINLESS STEEL VALVE ½"
- SAFTY SWITCH TO SHUT OFF MOTOR.(mounted on the lid)
- CONTROLLING LID (can be opened)

Agitator with two mixing elements, no burning

The stainless steel cooking pot is equipped with an agitator with two mixing elements: The lower element prevents the jam from being burnt, while the lateral one provides a good mixing of the mixture. At the bottom of the cooking pot is a special outlet with a valve where the mixture can be emptied and directly filled in the jars.
