our ideas work

Suitable products:

- coconut based sweets
- chocolate bars
- protein bars
- nutrition bars and other sweets

Forming products in any kind of shape.

The moulding machine works on the concept of moulding the product according to the requested shape. Suitable for forming coconut based sweets, for production of chocolate bars and nougets. Forming machine Former 600 allows you to produce products in a rectangular, roundround, triangular or any kind of shape. We are able to design the forms of any shape. It is ideal for producers of sweets - various types of nutrition bars, chocolate bars, coconut sweets, protein bars, chocolate sweets and many more.

Models: Former 600

Easy and fast changeover to new product

High speed production of exact-weight sweets. Moulding former machine is suitable for almost all types of products. The machine allows you to make a variety of forms and work with different materials.

Efficiency

Forming Machine has highly reliable frame and provides production capacity up to 800 kg / h, while low maintenance costs guarantee good value and quality. Hopper design and feeding system provide easy cleaning during the transition to another product material. Easy access for cleaning and replacement of equipment.

Advantages:

- Product of almost any shape.
- Simple design.
- Simple changeovers make it easy to produce various size and shape sweets.
- Easily replaceable molding plates guarantee a minimum changeover time.
- High quality with excellent preservation structure.
- Includes a programmable PLC that optimizes the molding cycle for each individual product.

Forming products in any kind of shape

Product material is not crushed or destroyed on Former 600 - instead it retains its natural alignment so that the finished product has the superior bite, texture and eating quality. The former produces formed products with excellent shape retention and weight accuracy using only air to release the products. We are able to design the forming plates in any shape you require.
